Samaschool equips people to earn a living wage through independent work.
Americans are increasingly turning to freelancing, independent contracting, and gig work to support themselves, advance their careers, and create the lifestyle they desire.

Samaschool is working to ensure that all parts of the workforce training system — including public agencies, job training programs, and community colleges — are equipped to prepare jobseekers to succeed as independent workers.

94% of net employment growth from ‘05-’15 occurred in “alternative work arrangements” 

25 - 35% of workers will be freelancing by 2020

50% of workers will be freelancing by 2027

1: Katz and Krueger, 2016
3: Upwork, 2017
Supplemental Income
Many people use independent work to supplement income from other full or part-time work. Some of these "side giggers" or "moonlighters" save or invest their extra income, while others use it to cover immediate expenses.

Career Development
Many people go through training programs to transition to a new career, but struggle to secure full-time jobs because they lack work experience. Because independent work is easier to secure, it can help people overcome this barrier and build their CVs.

Flexible Lifestyle
School, childcare, errands, etc — many people have commitments that get in the way of a full-time job. Independent work is a great fit for these people, because it provides the flexibility they need to work when and where they want.
OUR WORK

Samaschool provides training and advocacy aimed at building an inclusive economy that helps independent workers thrive.

**Modern Freelance Curriculum**
Our curriculum provides a unique blend of digital & professional soft skills that prepare trainees to succeed as independent workers.

**Flexible Partnership Model**
We provide flexible partnership models designed to integrate with nonprofits, workforce development organizations, community colleges, or government workforce systems.

**Research & Policy**
Samaschool performs ongoing research into the needs of independent workers, and shares our findings with policy makers and philanthropic organizations.
Successful freelancing requires an entrepreneurial skillset rarely taught in high schools, colleges, or vocational training programs.

Our training solves this problem by serving as a freelance training layer that can be integrated into existing programs. Our curriculum includes the following modules:
OUR WORK: Flexible Partnership Model

Samaschool serves as a freelance training layer that integrates into our partners’ training frameworks.

Our turnkey solution provides an easy way for nonprofits, workforce development organizations, community colleges, and government workforce systems to bring freelance training to their beneficiaries.

**Partnership Models**

- **Instructor-Led**
  Our core curriculum delivered on-site at partner locations by an expert Samaschool instructor or partner staff trained by us.

- **Instructor-Led Blended**
  Our core training program enhanced with state of the art eLearning technology & computer lab sessions that augment the classroom experience.

- **Self-Paced**
  Our self-paced online course, available anytime, anywhere. Features over 4-hours of interactive elearning content, exercises, and activities.

- **Self-Paced Blended**
  Our self-paced online course enhanced with instructor-led activities and coaching. An easy way for partner staff to lead in-person training sessions.
The rise of independent work has exposed shortcomings in existing workforce systems and labor laws, and is forcing policymakers, workforce development organizations, and corporations to reimagine the future of work.

At Samaschool, we conduct original research and convene leaders from a broad range of disciplines to explore ways to build an inclusive economy that helps independent workers thrive.
WHO WE SERVE

Demographics

Age
Avg: 30
- 16 - 24: 51%

- 48% of incoming Samaschool trainees had never heard of popular online work platforms such as TaskRabbit and Care.com
- Of those that were familiar with online work platforms, 94% had never performed work through them
MEET KRISTOPHER

New York City

Kristopher was a personal fitness trainer for almost a decade and started to have difficulty finding new clients when the market dropped during the recession. Eventually, he decided to upskill and enrolled in an IT job training program.

Samaschool allowed him to really leverage his newfound vocational skills. Kristopher started doing IT gigs via online platforms such as Field Nation and WorkMarket.

He attributes the experience he gained through those initial gigs to getting his first contract with the NBA as a replay tech analyst, marrying his love of sports with technology.

His first contract led to “second and third call backs” from the NBA, and eventually a full-time offer. Now Kristopher is employed with the NBA and continues to supplement his income with independent work.

“I definitely encourage people to do more gig work, instead of waiting for ‘that job’ to come.

Services Provided: IT support
Average Hourly Rate: $25
Share of Annual Income Earned via Independent Work: 25%
2017 IN PHOTOS
2017 HIGHLIGHTS

Graduated 546 trainees from instructor-led training and enrolled 237 in online training

Grew partnerships from 8 to 14

Awards: NYC Employment and Training Coalition’s 2017 Workforce Innovation Award, given inaugural #iamstride partner award

First gig economy government pilot with San Francisco Mayor’s Office
